

Has No Substitute

Use Of Flax Extends From Oatmeal To Fine Linen

It is safe to say that Canadian flax is not so much at the top of the list of things that are being sold as it is at the bottom. But when they want the real thing in handkerchiefs or other items of fine linen, it is for long ago. But when they want the real thing in handkerchiefs or other items of fine linen, it is for long ago. But when they want the real thing in handkerchiefs or other items of fine linen, it is for long ago.

The native cotton of flax is unknown but linen fabric, thread and thread oil, which are made from flax, have been found in excavations of the Stone Age, so these old forefathers of ours knew a great deal more than we in our self-consciousness attribute to them. In the best method of harvesting flax we have not advanced one iota beyond the time. The best fibre is obtained by the self-pulling and the best finishing results are obtained by using the old flax, afterwards crushing the seed heads with a roller. No substitute has been found to year to replace flax in the manufacture of fine linens and damask. Its use extends from the coarsest of flax to the finest of flax.

The total output of manufactured flax this year was factory valued at \$2,500,000 and much of the raw material was imported. Our total imports of flax, less duty, for the year were valued at \$1,000,000. The material and finished goods, have averaged over nine million dollars in the last five years. Linen thread from Paisley in Scotland valued at \$1,000,000, the important linen, making, along with linen yarn and twine, over one million pounds last year.

This information is contained in reports issued by the External Trade Branch of the Dominion Bureau of Statistics.

Created Wheat Grass

Is Not Injured By Long Periods Of Drought

The extensive operations now being planned for the rehabilitation of the drought areas in the Prairie Provinces have increased the interest in created wheat grass, resulting in renewed requests for the publication dealing with this grass issued by the Dominion Department of Agriculture, Ottawa. The reason is not due to seek. Created wheat grass is highly adapted to the soil and climatic conditions in Western Canada, especially in the short grass prairie area. The grass is especially suited to semi-arid conditions and will endure long periods of drought without injury. It has never been known to suffer from low temperature, and grows on a fairly wide range of soils. The publication referred to, which was prepared by Dr. L. E. Kirk, Dominion Agronomist, Dr. E. Clark, and T. M. Stevenson, Division of Forage Plants, includes almost everything that is known about created wheat grass. It deals with facts, the results of prolonged study and tests over Western Canada, particularly on alkaline soils, and reports of experts of the Division of Forage Plants and of various Dominion Experimental Farms, notably at the Dominion Range Experiment Station at Manaweybanke, Alberta. Experiments were also conducted at the University of Saskatchewan by Dr. Kirk, and are being continued by T. M. Stevenson, Agronomy Specialist of the Division of Forage Plants, Dominion Experimental Farms.

Just An Appreciation

The quick was selling an article which he declared would make him live to a great age.

"He's dead and healthy, and I'm over 90 years old."

"It is really as old as that?" asked the listener, of the youthful scientist.

"I can't say," replied the assistant. "I've only worked for him 100 years."

Man Was Optimistic

The chain letter had been sent now but folks of Quenest, B.C., still are hugging about a certain resident's optimism.

After perusing the chain letter, the man requested a \$500 loan of the bank manager, stating that he would repay the loan "as soon as my chain letter returns come in."

The loan was refused.

There are many mountain peaks measuring around 10,000 feet in height on the moon.

In Italy, people hear their calling cards when they pay visits to towns.

TAKES TWENTY-FIVE "IN-LAWS" ON A TOUR OF THE ROCKIES

Dr. Richmond and relatives

Because all his wife's relatives, including his mother-in-law, are "regular" people, and because they agree with him on politics, Dr. Thomas Richmond of Kansas City has taken twenty-five of them on a two-weeks' vacation to the Colorado Rockies, with all expenses paid by him. The aggregation left in an 18-passenger bus, two touring cars and a truck.

Big Variety Of Feeds

Canadian Livestock Feeders Have Wide Range To Choose From

The increased production of poultry feeders have a wide range of commercial mixed feeds from which to select their requirements. For the year ended September 30, 1934, there were 1,361 brands of mixed feed registered under the Feeding Stuff Act administered by the seed branch of the Dominion department of agriculture.

Poultry feeds are much more numerous than feeds for other classes of stock, and account for 90 per cent of the total. Dairy feeds follow with 120 brands, with cereals with 64, and hog feeds with 42.

The increased production of high protein or protein and mineral mixtures to supplement and balance rather than to replace farm-grown feeds, has been a notable development in recent years. A few years ago such preparations were rare, while in the year under review they amounted to 160 brands. This trend is in keeping with the teachings of agricultural leaders and recognizes the farmers' need to balance rations with the minimum cash outlay for purchased feeds.

In addition to these mixed feeds there were also registered some 278 brands of single feed materials such as linseed, meat scrap, fish meal, powdered milk and butter-milk, gluten feed, honey feed, brewers' and distillers' dried grains, etc.

Real Noah's Ark

Children In Lebanon See Bandstand Of Animals For Zoo

A real "Noah's Ark" put into the port of Lebanon. Hundreds of children of all ages collected on the quay when they heard the news. There were cries of joy when the seventy animals which comprised the passenger list began to disembark. One by one came—tiger, bears, zebras, swans, ostriches, kangaroos, sea lions, flamingoes, and many more. "Father Noah," in the person of the President of the Lebanon Zoological Gardens, was responsible for bringing them all the way from Germany on board the S.S. Stahlak, to enlarge the fine collection already existing in the local zoo.

After That Bishops Take Pleasure

In Court Cases

Next to feasting, litigation is one of the chief diversions of the Episcopalians. While walking through the market of Addis Ababa one sees one or more impromptu courts in session, says the National Geographic Magazine.

For alleged petty wrongs a man can join his opponent in feasting a passer-by to serve on the spot as judge, there is restraint, neither side is allowed to quarrel, and the judge usually is reached.

The judge thus is bound by custom to act since refusal might inspire him of a judge when accused or later he too will need one.

Each man pleads his own case and most of them are lawyers of no mean ability. If it is a case of a proved debt and the defendant cannot pay, the creditor can always claim the man to his wife, and thus he is accompanied in his comings and goings until the debt is settled. Criminal cases, of course, are handled by the courts.

The malarial epidemic in Ceylon took 15,000 lives from November to the end of April.

Blood flows through the bones of very young children almost as freely as it does through the veins.

Has Become Good Business

Attention To Detail Is Necessary In Turkey Raising

In view of the fact that the summer and early autumn months is the time when plans for the raising and fattening of turkeys for the Christmas market have to be made, the issue of the new series bulletin on The Care and Management of Turkeys, published by the Dominion Department of Agriculture, Ottawa, comes at an opportune moment. Turkey breeding has developed to a considerable extent in Canada during the past few years, and success has been attained where adequate care has been bestowed on the birds. As in other industries, attention to detail is necessary to success. The election of healthy, well-developed broilers, the management of the breeding stock, the proper feeding and housing of the turkeys, the provision of free range for growing birds, and, requisite sanitation are well-recognized essentials. In order to keep the turkey stock free from disease, the greatest care should be exercised in the feeding of the adult birds which should never be fed from the same trough, but from accurate and clean dishes or troughs, and too much caution cannot be observed in never allowing chickens to feed with the turkey flock during the season of the year when the chickens are frequenting the yard. With regular cleaning, of which full details are given in the bulletin, breeding flocks should not be confined to houses during the winter months but should be housed at night during the day. Little shelter is required for them. In any case turkeys should never be kept in a draughty place, and never be housed with chickens.

An Ancient Industry

Maquis Fishermen Caught Whales As Early As Ninth Century

The large catch of whales on the Pacific coast last year has drawn special attention to this ancient industry. The Maquis fishermen caught whales in the century, and, in fact, the Maquis species has almost died out. The overhauling of the Greenland or right variety, which its long plates of whalebone were so great demand for shaping and stiffening ladies' dresses and the oil was well as the cowboys of Mexico or Texas. . . . He is a romantic figure, dressed in a white coat, embroidered in red and black thread, and his head he wears a broad black hat. Like the cowboys of Texas, he is a silent individual, and he gives vent to his emotions chiefly in song, which he sings as he rides after his herd.

Live On Mountain Peak

Family Needs Carried Off Supplies For Long Snow-bound Season

The Grubbs family, occupants of the highest house in Victoria, situated on the peak of Mount Hailsham, in Australia, are moved in and out of the house in the mountain house, blizzard, deep snow-drifts and icy temperatures keep them prisoners. But they aren't worried. Mrs. Grubbs laid to a ton of snow, half a ton of sugar, hundreds of tins of meat and fruit, a ton and a half of potatoes, many hundredweights of turnips, parsnips and onions—1,000 lbs. of meat.

The apricot is believed to be a native plant of western and central Asia, extending eastward to China.

WORLD HAPPENINGS
BRIEFLY TOLD

The Duke of Gloucester, the King's third son, has been made a full member of the 10th Royal Hussars.

Before sailing for home the Canadian Hsley team enjoyed a round of hospitality at Chicago, Scotland.

The British House of Commons adjourned Aug. 2, to re-assemble Oct. 26, it was announced by the government, indicating no plans for a general election before next spring.

The electric chair installed in Sing Sing Prison 44 years ago has taken the lives of 270 persons, only four of whom were women, it was revealed by prison authorities.

Revelant combination of all British territories from the Cape to East Africa in a "United States of Africa" it suggested by G. M. Huggins, prime minister of Southern Rhodesia.

Many stores and factories, which have been closed since the recent fatal riots in Belgium, have resumed in the death of many Catholics and Protestants, have been reopened.

Harold Sutherland, 37, of Westville, N.S., first prize winner of the television, has an honored guest at a service club luncheon in Charlottetown. Three years ago Sutherland was Canada's champion fly player.

Improvement in barley crops and marketing were discussed when a field day was held at the University of Manitoba farm near Winnipeg under the auspices of the National Barley Committee.

Double details of military police posted outside the United States army reservation while officers, amid utmost secrecy, studied the "mystery ray" said to be capable of detecting the presence of a ship at sea through fog and darkness.

Record Of Publisher

Lord Atholstan Has Served Montreal Star For 60 Years

Lord Atholstan, publisher of the Montreal Star, the Montreal Standard, and influential in other Montreal publications, has attained to the venerable age of eighty-seven years and is still in active service, giving all his thought to the welfare of his country, his city and his daily service as a commentator on public affairs. He holds down his seat at his office, and never day but his direction of his newspapers is quite apparent.

Of his eighty-seven years some sixty-six have been given to the Montreal Star, and that is a record which has never yet been attained by any other editor or publisher in Canada—sixty-six years of continuous service and of rulership of the leading and most influential paper in Quebec, possibly in all Canada, for the Weekly Star is a wonder in its way, going each week to a quarter million subscribers.

Lord Atholstan was born as Hugh Graham, in the little village of Aylesbury, Huntingdon County, on July 5, 1848, but journeyed to Montreal, as did many other ambitious lads from the peninsula of Quebec. He started the Star whilst the other papers in the metropolis were in either a succumbent or a poor state—Sherbrooke Record.

Need Lots Of Sympathy

Editors Of Newspapers Do Not Have Easy Job

Governor Eugene Talmadge, himself an editor in Atlanta Georgia, shed a tear for newspaper workers. "Newspaper work is all work and no play, and very little pay," commented the governor. "I used to think anybody in newspaper work had a nice, interesting job. When you keep a paper going and try to keep your news columns interesting, let me tell you, brother, you've got a job on you. It's keeping my paper out of debt, but it's hard work."

The governor is associate editor of the Statesman, a weekly political paper.

Auctioneer's Voice Heard

A record of the auctioneer's voice was made during the sale of the Mountbatten's furnishings, and will be stored away for the benefit of posterity in the Gallery of Famous Voices and Famous Occasions in Broadcasting House, London. The auctioneer's voice will keep company with those of Britain's greatest men and women, from the King and Queen down.

Doctor—"But, my dear man, I can't prescribe without knowing more than I am sure you need it. What are your symptoms?"

Patient—"What symptoms should I have, doctor?"

The Joys Of Motoring

For One Day

Everett Chief Draper never had any more trouble with parking and parking than a well known man had the other day.

The aged sportsman, who spent much of his life in a small car and a large truck, but despite clever manipulation, the space was a bit too small.

Climbing out, he stepped back to the sedan, only to find it locked, and the driver's door was open. He got out of the truck, hopped into the car, and the driver's seat, released what he thought was the emergency brake.

On your street.

Of course, you think the tale ends there, but our man has not had luck, and this, worse our heart, is a true story. He casually tossed a cigarette out the car window and some time afterwards smelt smoke.

Looking about, he discovered that the lighted cigarette had gone into the back of the car on the road, and that said back seat was now on fire.

Keeping his presence of mind, he stopped the car, lifted the fire extinguisher, and threw it over the fence into the street.

And while he was congratulating himself on getting out of that nasty situation, he heard shouts.

Turning around, he saw a fire in a hay field, which, before the volunteers had it quelled, had burned two acres of hay—Toronto Telegram.

The Rubber Industry

Protection Has Shown Antagonism

For the Rubber Industry

Rubber as an industry has been one of the most phenomenal growth and is one of the highlights of twentieth century civilization.

At the beginning of the present century, production of the present century, production in 1904 it had reached approximately 1,000,000 tons.

Of this the chief rubber producing centers in British Malaya which produced 465,700 tons of rubber last year, or 46.5 per cent of the total world's supply, according to the Industrial Department of the Canadian National Railways.

The improvement which has taken place in world trade is reflected in the value of the rubber exports from British Malaya for the first ten months of 1934, which increased to \$229,450,000 from \$122,500,000 for the same period of the year previous, or 77.4 per cent. At the beginning of last year, British Malaya had 1,135,000 acres of land under rubber. A great deal of soil comes from British Malaya. Imports into British Malaya from Canada show an increase of 100 per cent in 1934 over 1933, principally in motor cars, dried fish, canned milk, canned vegetables, wheat flour, timber.

Dalai Lama Chosen

Search Last Night Eighteen Months Before

Search Last Night Eighteen Months Before

It has taken eighteen months for the Grand Lama to find the right successor to his throne. The search was held in the Snowy Kingdom, a hidden place of the Himalayas, where the chosen successor must be a Tibetan boy, born at the same moment that the Dalai Lama died, and into whose body the august ruler's soul has passed.

A communion of seven priests searches for this baby, and on this occasion found twenty, from whom six were chosen by the Grand Lama for final selection before the praying-wheel and image of Buddha in the Lhasa palace.

After being anointed with sacred butter, and bathed in water from the Ganges, the new infant Dalai Lama, guarded by soldiers, is escorted from his mother's house.

He is educated for his high station, but also is recompensed with material gifts. He is to take the place of his predecessor to the palace treasure chamber, and may carry away as much gold and gems as he can gather in his first year. This is a pleasure, three times as big as Prince, almost as big as Siberia, and most of it higher than Mount Blum.

Known the world over as merely Queen Mary her Britannic Majesty's array of names, runs off the line: Victoria, Mary Augusta, Louise Olga Pauline Claudine Agnes Windsor.

Travelling more than 3,000 feet each second, bullets from powerful rifles are the fastest things on earth next to light and electricity, experiments at Montreal show.

Woman learning to drive: "But I don't know what to do!" Her husband: "Just imagine that I'm driving." 210

ITALY

Italy is rewriting an heroic page of her history.

—Munich.

Ends Long Canoe Voyage

Montreal Girl Makes Trip To New York Alone

York Alone

"Fed up" with humanity, Ida Lynn, 22-year-old Montreal social worker, recently completed a 850-mile water trip from Montreal to New York in a 13-foot Eskimo kayak.

"This trip has been a good rest for me," she said, and she finished telling of the rigors of the voyage. Storms and rapids meant the route—taken by the pioneers of 80 years ago.

She is the first person to make the trip single-handed, said Capt. R. W. Ryne, president of the George Washington Boating Association, New York, at whose foot she tied up.

Miss Lynn, a native of Denmark and a naturalized Canadian, said the first leg of the trip was the hardest.

"There's a lot of white water in the Richelieu River between Montreal and Lake Champlain, and several rapids I had to backstroke," she said. Her coolheaded craft held herself two years ago.

Miss Lynn returned to Montreal by airplane.

New Famous Nurse

Ontario Minister Was Once Engaged To Florence Nightingale

Among the interesting books and papers which have been presented to the University of Western Ontario, London, by Thomas Connor of Goddard, is a collection dealing with Rev. John Smith, who died at St. John, Ontario, in 1867, and who in his youth was engaged to Florence Nightingale, the famous nurse. Rev. John Smith was born in Derbyshire, England, and was a cousin of Florence Nightingale. In his youth they were engaged to be married, but as he was an older man the family objected and the engagement was broken. Mr. Smith came to Canada as a missionary and his fiancée went on to reach great heights of fame as a nurse.

No Doubt About It

"You're up your hands, big boy, and you're up your feet!" ordered the gentleman with the gun.

"Ah, calm!" replied the victim.

"Ah, go rhinoceros!"

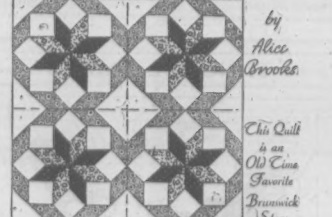

"Yes, you kin," said the footpad.

"Ah, calm!" replied the victim.

"You win, Mista, you win!" said the victim, as his hands went skyward.

"It does look lak you're 'tice is de strongest!"

Household Arts

"Twinkle, twinkle little stars" and they're really not so very far, for a beautiful patchwork quilt. The "Bruswick Star" with the eight clearly defined points, bordered by eight contrasting diamond patches, is the delivery of a snow crystal, yet is surprisingly easy to piece, and make a decorative repeat on an all-quilt. Only four materials are needed for it, and to simplify matters, there are only three pattern pieces. This quilt is in pattern 5249 you will find the Block Chart, an illustration for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

To obtain this pattern send 20 cents in stamps or coin (note preferred) to Housecrafts Dept., Winnipeg Newspaper Union, 115 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Meet All Demands

Planes Have Built Newline Can Handle Safety

Eugene Vidal, federal director of air commerce arrived at Detroit from Washington and reviewed the proposed plan to date in the nine most promising projects concerned with the development of a light and inexpensive airplane sufficiently safe for any automobile driver to fly.

Despite the apparent inability of the aircraft industry to believe in the possibility of turning out 8700 airplanes as indicated by the machine on exhibit at this 1935 All-American aircraft show, Vidal asserted there is every hope that such a machine will be on the market within a short time.

He said several builders whose experimental designs were ordered built by the bureau have turned out machines which seemingly meet all these demands.

"At least three of our projects are very promising indeed," he said. "The ships can be flown absolutely safely by any person having a driver's license. They land themselves handsoff or with the stick, all the way back from 200 feet. They are what we call safe airplanes. They can be flown with only a couple of hours instructions almost by anyone at all."

When dissolved in water, the property of turning red litmus, a dye extracted from certain lichens, blue. A substance which changes its color upon the addition of an acid or alkali, is known by scientists as an indicator.

The most common alkalis are sodium hydroxide or caustic soda, potassium hydroxide or caustic potash, and ammonium hydroxide or ammonia water. In science the term base is also designated an alkali.

Ammonia hydroxide is a white solid compound which may be prepared in solution by dissolving ammonia gas in water and the solution is usually called "lawn." This solution has a strong odor of ammonia.

Ammonia hydroxide is used on a large scale in the manufacture of soda ash. This is done by heating ammonia gas with carbon dioxide and water, and the solution is usually called "lawn." This solution has a strong odor of ammonia.
